Jeimmy Lopez Vega

👤 About

I'm passionate about web development. I have experience in the design and development of high-quality websites and user interfaces. I have constantly trained, which has allowed me to develop solid knowledge in the area. My approach in a project is focused on creating innovative and efficient solutions. I am able to work independently or in a team, always with a positive attitude, discipline, leadership and a lot of willingness to learn.

💼 Work Experience

Web Developer, Autonomous
December 2022 - Present

Design, development and optimization of websites for professionals who provide professional services autonomously. Tasks:
- Define, design the structure and make the prototype of the project.
- Define the technologies to be used in the project according to the user's requirements.
- Develop website performance, accessibility and usability tests to provide a good user experience.

Tools: WordPress (Elementor, Divi) • HTML • CSS (Tailwind, Bootstrap) • JavaScript (Reactjs, Nextjs) • Git | GitHub.

Web Developer, Decimo Technology
July 2022 - December

Restructuring and maintenance of an ATS web platform as an internal company project.

Tasks:
- Develop an email notification system, adaptable to any type of SMTP
- Creating an automatic notification system using CronJob.
- Implement new views in the system.
